Via Jobcenter Aarhus

Job Internship Guidance

Job, language and corporate internship is a 10-week course which focuses on getting you on to your next job. Classes are held 3 days a week, where we will cover a number of topics such as:

- Where are the job opportunities
- Competence clarification and job objectives
- Workplace culture
- Own job search within the Danish labor market
- Danish workplace language

Jobs & Corporate Internships

Throughout the course, there is a focus on jobs and corporate internships. Together, we will work on a plan about where you can start a corporate internship or job at the end of the course.

How

During the course, you will meet professional staff with many years of experience within recruitment, vocational and educational guidance, competence clarification and career advice. Throughout the course, we will teach a number of useful methods and tools to be used in your job search. You will also get individual guidance and help.

You are welcome to bring your own laptop, or borrow one of ours. If you have difficulties with IT, we will help you with that as well.

Danish on the job

We work on training you to a level of Danish that you will be able to use in a workplace: Workplace Danish, conversing with colleagues, following/giving work instructions, etc. We also train you in making a good presentation to an employer, as well as going to job interviews and writing applications. All the teaching takes place in Danish - in teams and in groups.

There is free coffee and tea, and the opportunity to use the refrigerator and microwave freely.
